

Have complete peace of mind
knowing SICURNET is always watching
your back online

Today, the internet provides endless opportunities to connect with the world. However, the chances of your data being compromised and misused on the dark web by hackers and fraudsters are far from slim. To reduce these risks, it is important for you to be safe online.

Introducing **SICURNET** – a truly effective solution that ensures complete peace of mind by always watching your back and alerting you, in case your digital data is exposed.

Why Sicurnet?

Online Data Protection

The circulation of your personal data such as date of birth, addresses, usernames, PAN number, identity document numbers, e-mail addresses and landline/mobile phone numbers is continuously monitored.

Monitoring of Card & Bank Account Numbers

Credit/debit card numbers and bank account numbers are constantly monitored for all-round security.

Protection Against Risk

Thanks to constant monitoring, Sicurnet sends a warning whenever any of the monitored data is exposed or detected in high-risk web environments.

What does Sicurnet offer?

Monitoring and Alerts

If your data is exposed in high-risk web environments, you will immediately receive an e-mail alert, along with advice on how to protect yourself from possible fraud.

Specialist Assistance

Sicurnet experts are available to clarify any doubts regarding the actions you need to take.

Monthly Summary

Every month, you will receive a summary of all the stringent checks carried out.
